EU-189 Isle of Rockall –update

"Update from the vessel. They have been unable to land on Rockall to recover equipment due to weather conditions. They are returning to the mainland. The team will re-plan for the next recover attempt."

3D2BJ Fiji and Rotuma –update

BJ reports there seems to be some confusion about his operating QTH. If you go to this site and find the "red dot" you will know exactly which island he is operating from. His plan is to depart Rotuma on 07/19 at 0600 UTC and sail to Fiji mainland. He will try to stop in the Mamanuca Group and operate from there on his way to Vuda Marina, Viti Levu.

W8S Swains Island –update

From October 4, 2023 until October 17, 2023 an international team of 10 operators will be active from Swains Island as W8S. QRV on all HF bands in CW, SSB, FT8 and RTTY with 6 stations from 2 separated camps. The base camp (Green Camp) will be established in the area of the old village. It is also the place where the landing will take place. The base camp will accommodate the support team, where we will have our meals and where we can relax when not on duty. It will also have a shower and toilet facility. Sleeping tents for the operators will be next to the base camp. We will have two operating sites, i.e. Re Camp and Blue Camp. These two camps will be separated approx. 400 meters. A temporary operating site will be established more to the east, from where we will do our 6m EME operation.

Amateur Radio Prefix Maps 2023

A fantastic piece of work by Sal, 9K2GV. Many pay to read books do not cover maps and grid references in such detail so this really is a very good resource. Please note the download is a hefty 427Mb and the pdf sheet runs to 394 pages but is worth it. The file expires in 7 days time.

CBOZA Juan Fernandez Island –update

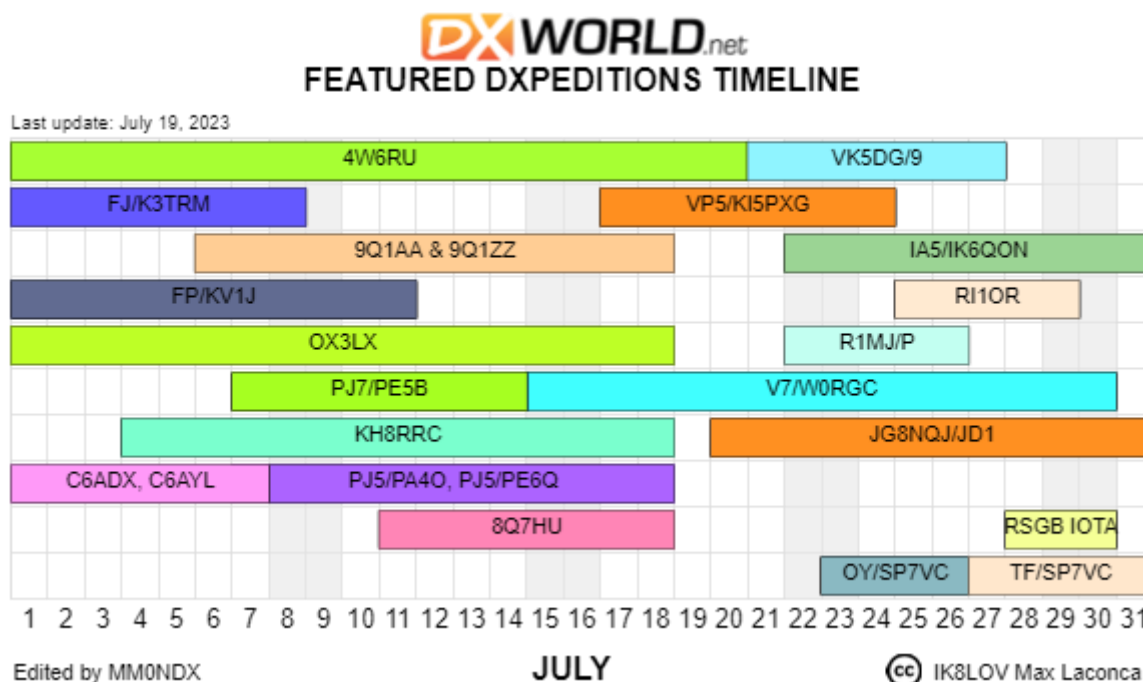

One of the objectives in this DXpedition is to give the opportunity to contact Juan Fernandez island on as many bands and modes as possible. For this reason the team are implementing 2 VHF stations; one for 6 and other for 2 meters to try to make QSOs in EME mode.

XW0LP Laos –update by Simon

'I have retired now to live again in Luang Prabang. I am operational on 20 metres FT8 and I hope to be operational soon also on 40m, 15m, 12m and 10m (80m, 30m and 6m are now not authorised for use in Laos). Top band operation is a challenge from my small garden! NOTE: If you have a recent QSO with my station, please be patient for the QSL as I am currently reprinting these! Please use Club Log OQRS for all QSLs. I no longer use LoTW (too much hassle when

changing laptops).'
