8Q7HZ Maldives –update April 10 by Tev TA1HZ

After arriving at the hotel, I setup the antenna – the Windom did not work well so together with Ali 8Q7AM we setup an EFHW. Beware, I have Murphy around! First the laptop stopped RX on FT8, then the antenna went DEAF. When I trx, I can see that my signal is heard on reverse beacon but I do not get anything on the screen. Trying to solve the problem!

TX7W Austral Islands –update April 10 by Jeff K5WE

Final preparations are being made for the TX7W – Austral Islands DXpedition. Jeff – K5WE and Craig – W5CCP will depart Tulsa next Sunday April 14 and hope to be on the air from Raivavae sometime on April 16. Many thanks to all our sponsors, your donations are a big help. For more info visit [here](#) [or [DX-World](#)].

OJØT Market Reef DXpedition –update

A quick informal meeting was held yesterday, where the team discussed the final bits and pieces for this DXpedition. Now the ferry tickets are booked and most of the equipment settled. We are now working on gathering enough coaxial cable. Turns out it accumulates quite a lot of RG213 with four radios, and at least one antenna on each – who would've thunk, eh?

Bjørn, LA1UW, is building a new 6m/4m yagi for this expedition. While it might be a bit early for any good 4m openings, we'll give it a try anyway, just in case. We will announce any 4m activity on DX clusters, so keep an eye open if OJØ on 4m is of interest.

Stian, LB5SH, will mainly focus on SSB and FT8, but is also practising CW and might give it a go, hoping it won't end in carnage. If you catch us calling and the op seems a bit, oh shall we say, "slow," then please show some mercy for this rookie CW op.

Tor, LA3WAA, also plans to work more CW and SSB this time. He is also constructing a new vertical antenna for this trip, 40-10m, coupled with an optional inv-L for 80m.

Kristoffer, LBØVG, is working on his homebrew 1.2kW PA which has entered the test phase. He's also considering bringing his SAT kit, so if you're into that: this is your cue.

A80OK Liberia –update April 10

Earlier today, team prepared extra RX loop for 40/30m bands. Pictures credit OK2ZI. Approaching 50K QSOs – logcheck [here](#).

FT4GL Glorioso Islands –update April 8

Last weekend F5RQQ, F4FTV, F5TVL as well as other members of F4KLW; F4FHV and F4IPL came together to prepare and adjust the vertical antenna planned covering 40 to 10m. This week the 160 and 80m vertical antennas will also be tested and at the end of the week the majority of the equipment will be sent to our carrier.
